

**Synergy Software Solutions** has been established with an aim to provide IT-software solutions and IT-enabled services to business clients.

Synergy's strength lies in providing software solutions and web based solutions using leading-edge technologies. We keep on building our technological strengths by updating ourselves with the newest of technologies touching the market so that we can give the best to our clients.

**Customer satisfaction** is one of our prime goals. We take optimum care and do not compromise with this goal.

**Synergy Software Solutions** works with the motto "**One stop to all your software needs**". We are committed to this and provide a range of services to satisfy the computing needs of your organization. The computing needs may range from automation of the business process, web site development, reaching out to the world by website promotion, data conversion to electronic form. We value your requirements and can fulfill and complete the work to your satisfaction.
